DECEMBER 2014

Club News

- ⌘ Ken has made a couple of trips to the 147.000 repeater site located on TV Road and the machine is back on the air and now has a backup power supply which was donated by Austin(KA5MAN). The repeater frequency is 147.000, positive offset and a tone of 136.5.
- ⌘ Jim (K5JIM) is making great progress on the LoCoARC website <http://www.lowndescountyar.com/>. The site has taken on a new and cleaner appearance than that of our old outdated site. This will be a quality site which we can all be proud of. Jim is still in the design phase and accumulating informational content. I am eager to see what he comes up with next.
- ⌘ Don't forget about the next meeting! It will be at Ryan's Steakhouse at 7:00 p.m. on December 4th(Thursday). See you all there!
